DECORATIVE  
16MM DOORS & PANELS

[polytec.com.au](http://polytec.com.au)

## Decorative 16mm Doors & Panels

**polytec**'s Decorative 16mm Doors & Panels provide a versatile surface solution for residential and commercial interiors. Australian made and available in an extensive palette of colours, woodgrains and finishes, the range supports the creation of cohesive, enduring interior schemes.

Suitable for cabinetry, shelving, wall panelling, furniture and custom joinery, **polytec** Decorative Doors & Panels integrate seamlessly with the broader **polytec** range, allowing colour, texture and finish selections to flow throughout a project.

Available in a broad selection of surface finishes, including Woodmatt®, Smooth, Texture, Matt and Sheen, the range offers design flexibility while maintaining consistency across interior applications.

Manufactured on moisture-resistant MDF, **polytec** Decorative Doors & Panels deliver a durable, low-maintenance and hygienic solution for everyday interiors. Backed by **polytec**'s commitment to Australian manufacturing, quality and innovation, the range is supported by E-Zero emissions technology and a 7-year warranty, providing confidence from specification through to installation.

## Environment & Sustainability

**polytec** is a 100% Australian family-owned brand and for over 30 years, we have taken pride in being an Australian manufacturer, with sustainability ingrained in the core of our operations, products, and work practices, shifting towards continual dedication to improving and enhancing our environmental performance. This involves a steadfast reduction of our carbon footprint, minimising waste, optimising energy efficiency, and integrating ethically sourced materials into our product ranges.

Our MDF and Particleboard are manufactured from managed and renewable plantation pine that has been Green Tag, Responsible Wood and PEFC certified. All **polytec** board products are manufactured from E0 or E1 substrates, with particleboard now made from a percentage of recycled wood material.

The reDirect Recycling Wood Recovery Initiative services **polytec** customers by collecting raw and melamine coated particleboard offcuts for reuse. These materials are diverted from landfill and repurposed into new particleboard within our closed loop manufacturing processes, reducing waste and preserving valuable plantation resources.

**polytec** is striving to reduce carbon emissions by installing solar panels throughout all sites nationwide. Since 2018, over 46,000 solar panels across the network of facilities have been installed. When installed, the Oberon facility was Australia's largest rooftop solar system with over 27,000 solar panels over eight hectares.

**polytec** is on a journey – one that places sustainability at the centre of how we design, manufacture, and support our customers. We believe that sustainable practices are the foundation of strong, resilient communities – and we're committed to contributing to a healthier, more sustainable future for all.

## Care & Maintenance

**polytec** does not recommend the use of Decorative 16mm products in a sliding or non-fixed application (hinged) unless the use of a mechanical stabilising system is fitted. Decorative 16mm doors and panels are supplied with a protective film to protect the surface during installation. This film must be removed within three months of installation.

Your Decorative 16mm doors and panels are made from a Moisture Resistant Medium Density Fibreboard (MR MDF), but as with many wood based panels, they are not waterproof. Care should be taken to wipe up spills immediately, ensuring the doors are not exposed to high or continuous levels of moisture, steam and humidity.

Decorative 16mm doors and panels should be cleaned by wiping down with a damp soft cloth and warm soapy water. For more stubborn stains, use a good quality streak free glass cleaner as per the manufacturers recommendation. You may also use Methylated Spirit on a soft cloth, using a circular cleaning motion being careful not to rub too hard.

By following these simple steps you should retain a beautiful kitchen surface for many years.

Visit [polytec.com.au](http://polytec.com.au) for specific care and cleaning information.

## Important

Darker colours will show superficial wear and tear more readily than lighter coloured surfaces and require more care and maintenance.

Createc and Venette are a painted product and as with many painted materials a slight odour may occur when fresh, or if not permitted to air. The products comply with Green Building Council of Australia. Green Star Design & As Built V1.3 – 13.1.2B & 13.2. Green Star Interiors V1.3 – 12.1.2B for emission of VOCs.

The colours and details shown in this brochure are to the highest standards in printing. However, they should only be used as an indication of actual product colour. To order your free colour sample visit [polytec.com.au](http://polytec.com.au).

**polytec** swatches and samples represent a small area of the overall colour structure. To view a large colour sample or a full sheet design, visit [polytec.com.au](http://polytec.com.au).

The use of our current samples gives the colour and finish that a customer would expect to receive. Samples are provided for colour and finish selection, and **polytec** recommend testing a sample for fingerprint resistance and ease of cleaning. **polytec** does not guarantee exact colour matches across product ranges due to colour variation in each product group.
