ENVIRONMENT & SUSTAINABILITY

polytec is a 100% Australian family-owned brand and for over 30 years, we have taken pride in being an Australian manufacturer, with sustainability ingrained in the core of our operations, products, and work practices, shifting towards continual dedication to improving and enhancing our environmental performance. This involves a steadfast reduction of our carbon footprint, minimising waste, optimising energy efficiency, and integrating ethically sourced materials into our product ranges.

Our MDF and Particleboard are manufactured from managed and renewable plantation pine that has been Green Tag, Responsible Wood and PEFC certified. All **polytec** board products are manufactured from E0 or E1 substrates, with particleboard now made from a percentage of recycled wood material.

The reDirect Recycling Wood Recovery Initiative services **polytec** customers by collecting raw and melamine coated particleboard offcuts for reuse. These materials are diverted from landfill and repurposed into new particleboard within our closed loop manufacturing processes, reducing waste and preserving valuable plantation resources.

polytec are striving to reduce carbon emissions by installing solar panels throughout all sites nationwide. Since 2018 over 46,000 solar panels across the network of facilities have been installed. When installed, the Oberon facility was Australia's largest rooftop solar system with over 27,000 solar panels over eight hectares.

polytec is on a journey – one that places sustainability at the centre of how we design, manufacture, and support our customers. We believe that sustainable practices are the foundation of strong, resilient communities – and we're committed to contributing to a healthier, more sustainable future for all.

CARE & MAINTENANCE

polytec's Benchtops are supplied with a protective film to protect the surface during installation. This film must be removed within three months of installation.

The surfaces of **polytec**'s Benchtops are made from a stain-resistant resin. The toughness and high impermeability of this surface means that **polytec**'s Benchtops & laminate should require no more than wiping with a soft cloth, dampened with plain water or a household detergent mix to remove all common household spills.

polytec's Benchtops & laminate should be cleaned by wiping down with a damp soft cloth and warm soapy water. For more stubborn stains use a mild household cleaning spray. Always ensure you refer to the recommendations provided by the manufacturer of the cleaning product before use.

By following these simple steps you should retain a beautifu surface for many years.

Visit www.polytec.com.au for specific care and cleaning information.

IMPORTANT

Darker colours will show superficial wear and tear more readily than lighter coloured surfaces and require more care and maintenance.

The colours and details shown in this brochure are to the highest standards in printing. However, they should only be used as an indication of actual product colour. To order your free colour sample visit www.polytec.com.au.

polytec swatches and samples represent a small area of the overall colour structure, to view a large colour sample or a full sheet design, visit www.polytec.com.au.

The use of our current samples gives the colour and finish that a customer would expect to receive. Samples are provided for colour and finish selection and **polytec** recommend testing a sample for fingerprint resistance and ease of cleaning. **polytec** does not guarantee exact colour matches across product ranges due to colour variation in each product group.

21mm **Square Edge** benchtops

Mixing timber finishes and solid colours in kitchen design are becoming increasingly popular and for good reason. By combining different finishes, it creates visual drama and complements styles from classic coastal to mid-century modern.

Timber benchtops are a popular choice as they bring warmth and soul to a kitchen. The combination of **polytec's** 21mm Square Edge laminate timberprint benchtops and solid coloured cabinetry strikes a perfect balance, bringing a stylish and sophisticated edge to any space

21mm Square Edge tops are available in a wide variety of wood grains and solid colours, including Ravine, Woodmatt, Smooth and Matt ranges.

The Woodmatt range is the most popular choice for a timber finish. With a subtle woodgrain embossed matt surface and the realism of veneer, you will find a timber look to suit your needs.

polytec's innovative 21mm Square Edge benchtop range is stylistically individual, functional, and affordable.
