

How to Order Sharknose Edges

How to order bevel edges in the portal.

Flatpax
— CUT TO SIZE —

01 ENABLE RECESSED HANDLE OPTION

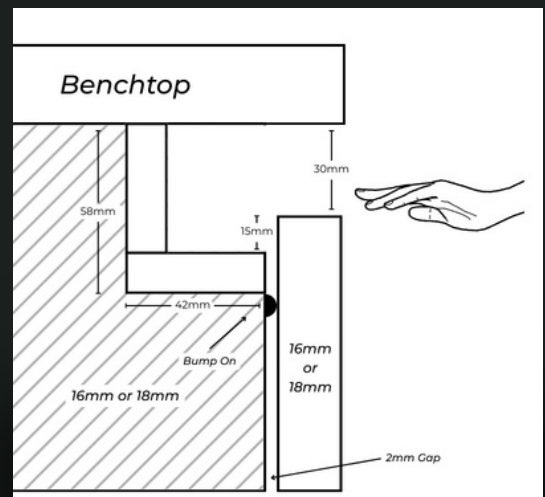

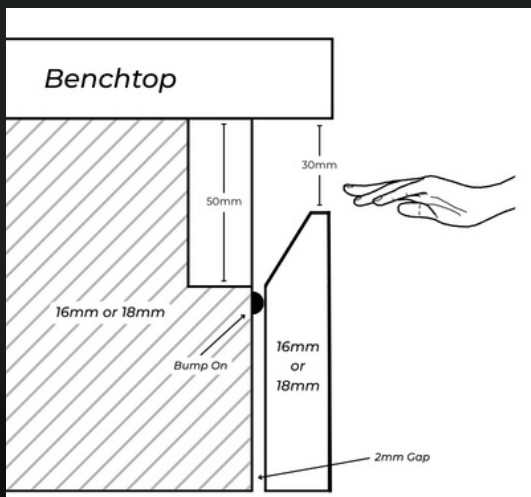

In either base or drawer cabinets, to activate your bevelled edge doors select your recessed handle option from the dropdown menu.

***For cabinets which don't have a recessed handle option, contact us for options.**

02 SELECT RECESSED HANDLE TYPE

50 x Door Thickness Recess - Melamine
50 x Door Thickness Recess - Paint Grade

58mm x 42mm Carcass Notch

OPTION 1 - SHARKNOSE HANDLE
Automatically assigns a sharknose door or drawer and 50mm carcass cut-out.

OPTION 2 - SQUARE EDGE HANDLE
Automatically assigns 58mm x 42mm carcass cut-out. *Door stays square edge.*

03 ORDER YOUR RAILS

When you save your cabinet the system will prompt you to order your carcass rails.

Option Selected: Recessed Handle

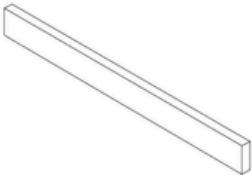

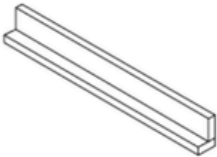

You've just saved an item to your job which includes recessed handle cut outs in the cabinet sides. Would you also like to add in rail for this?

Product Search:

Flat Fingerpull Rail L Shape Fingerpull Rail

05 ENTER RAIL MEASUREMENTS

Flat Fingerpull Rail

Quantity: *

Height: * mm

Width: * mm

Flat Fingerpull Rail

My Notes

Product Description
Fingerpull rail piece for inserting into cabinets recessed handle sections. Rail will default to Horizontal Grain regardless of selection.

This rail will be ripped down to 50mm to suit the recessed handle. Please order at 70mm. Grain will default to horizontal (Please change if required).

For **flat fingerpull rail** you **must enter 70mm**, this is minimum height for the CNC but will be given to you at 50mm.

L Shape Fingerpull Rail

Quantity: *

Height: * mm

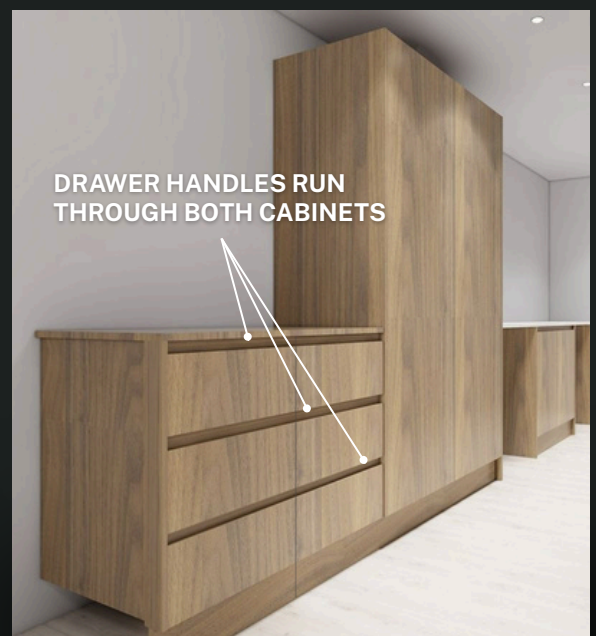

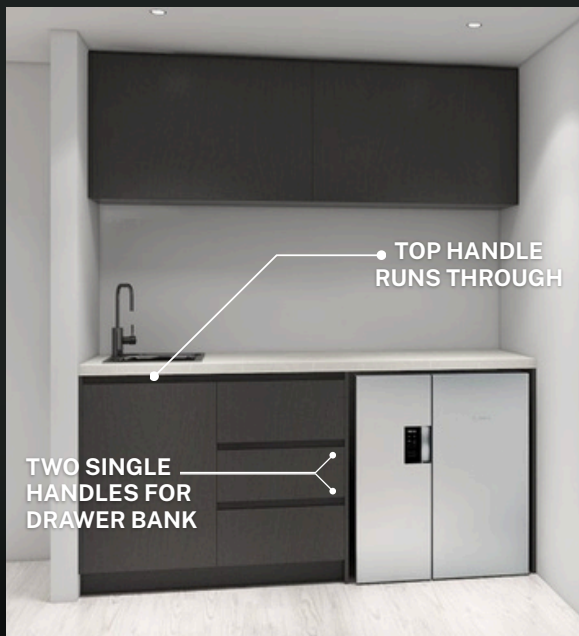

Width: * mm

Depth: * mm

For **L shape fingerpull rail** make sure **height is 58mm** and **depth is 42mm**.

06 MANUALLY ENTER CORRECT HANDLE RAIL LENGTHS

These will vary depending on the job, **For example**
